SUMMARY

Dynamic Software Engineer with 10 years of experience in cloud development and deployment, specializing in **Microsoft Azure** services. Successfully developed scalable microservices that enhanced system reliability by 30% and reduced operational costs through optimized resource allocation. Adept at creating innovative solutions, including **Native React Applications**, **SPFx web parts**, and **AI-powered systems**. Seeking a **Software Engineer** role to leverage expertise in **front-end and back-end development**, **cloud engineering**, and driving operational efficiency and innovation.

EXPERIENCE

Software Engineer

Altera Digital Health

April 2020 - Present, Mellville, NY

- I specialize in cloud development and deployment, particularly leveraging Microsoft Azure services.
- My primary focus is creating SPFx web parts and SharePoint sites tailored to meet the needs of various business teams.
- With over 4 years of experience in this position, I thrive on designing efficient solutions that enhance productivity and collaboration within the organization..
- Developed and deployed scalable microservices on Microsoft Azure, improving system reliability by 30% and reducing operational costs by optimizing resource allocation and automating deployment pipelines.

Web Applications Developer

Campsite

September 2014 - April 2020, Portland, OR

- Enhanced platform functionality by implementing advanced JavaScript and PHP features.
 - Engineered and integrated PHP and JavaScript features through Agile processes, enhancing application interface fluidity.
 - Implemented changes using CSS/SASS to ensure full mobile responsiveness and dynamic user interactions.
 - Coordinated data transformation tasks utilizing SQL, enabling precise client data processing and import tasks.
-
